

# Technical Data Sheet

## SOLAR LIGHT CONE BASE

Code: WR801

### Description

A super bright signal is generated each night to accommodate emergency warning light needs. It can have the drivers more attention, reduce the possibility of vehicles collision. Ideal for night time use.

### Features:

- Solar power
- High intensity double sided light with bright LED lights
- Photocell switch
- PS flashing lens
- On/Off switch to turn off when stored
- Visual distance – more than 500 meters.

### Application

- Traffic
- Police Equipment
- Construction Site
- Highway
- Bridge Vessel, Vehicle, Trailer, Truck.

### Product Origin

China

### Packing

Packing: 12pcs/Carton

Carton details: 57X39X39.5CM

GW: 4.8kg | NW: 4.2kg

### Battery

Lithium-ion Solar Battery 1500ma 3.7V is a type of rechargeable battery for portable electronics with a high energy density, tiny memory effect and low self-discharge.

Solar Panel	6V 80mA
Battery	3.7V 1500mA
LED	2 Pieces
Lighting time	50 hours
Work mode	light-control
Visual Distance	500 meter
Lifespan	2 years
Work temperature	-20°C-55°C
Lamp Cover Material	PS
Base Material	PE
Net weight	335g
